

Mailyn Fidler is a junior at Stanford University, where she is pursuing dual honors in Science, Technology, and Society and International Security Studies.

At Stanford, Mailyn has been involved in research on the Internet of Things, virtual reality, cybersecurity, and terrorism. She is currently interning for the National Telecommunications and Information Administration and will soon begin an internship with Google, in both cases pursuing policy implications of her scholarly interest in Internet-connected objects.

As a junior at Stanford, Mailyn composed an honors thesis on governance of the Internet of Things and will be pursuing a second thesis on the evolving relationship between terrorism and technology. She plans to pursue graduate work in International Relations.
