# **Narrative Foresight Techniques for Scenario Generation using “Eventuality”**

**Michael Burnam-Fink**

PhD Candidate, Human and Social Dimensions of Science and Technology

How can we  
engage with **an**  
**uncertain future?**

# Narrative Foresight

Scenarios

Science Fiction  
Prototyping

EVENTUALITY

Building  
Imaginative  
Capacities

# Scenarios are about discovering **biases** and finding **alternatives**

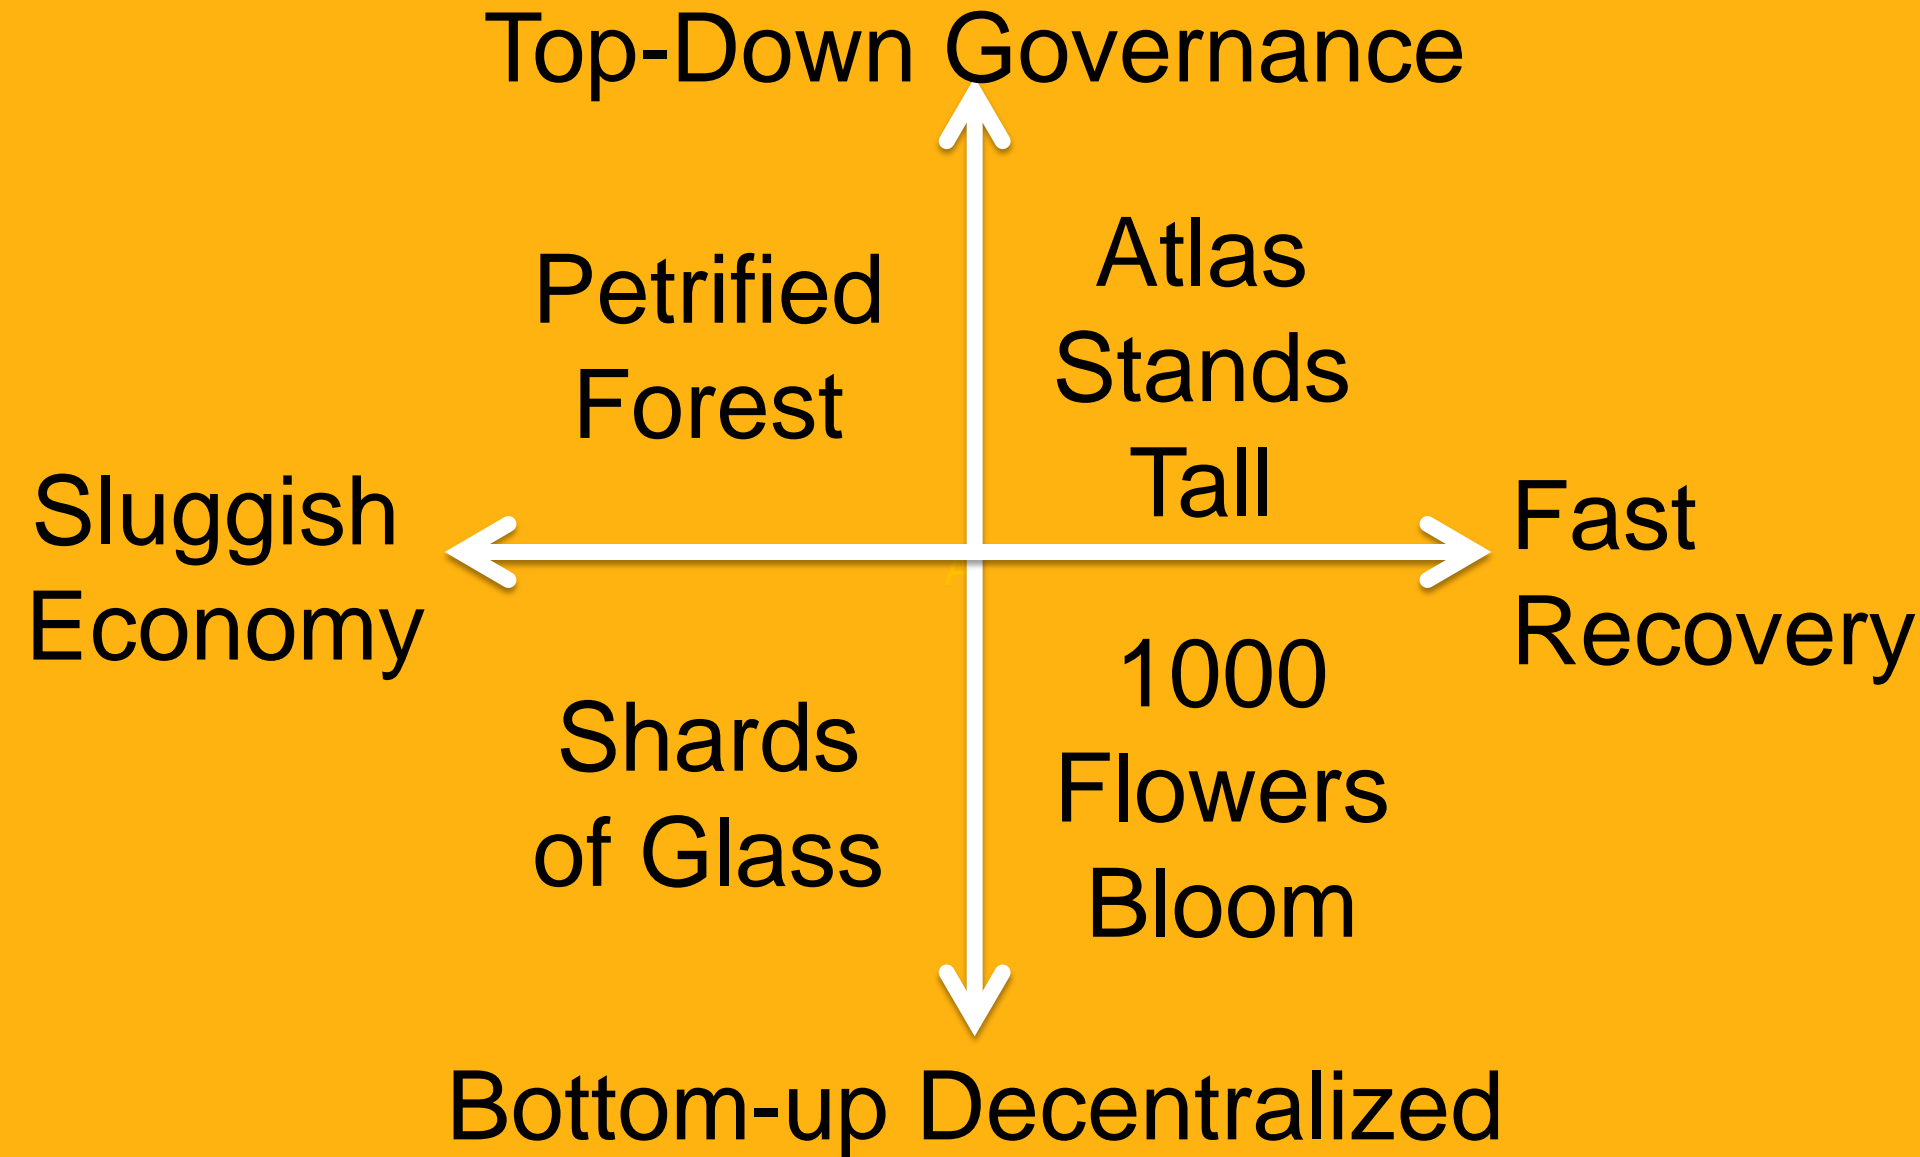

“Scenarios deal with two worlds: the world of facts and the world of perceptions. They explore for facts but they aim at the heads of decision makers. Their purpose is to gather and transform information of strategic significance into fresh perceptions.”

--Pierre Wack

Society

Environment  
Policy

Predetermined  
Elements  
  
Critical  
Uncertainties

# Africa 2025

**Scenarios are stories**

...but they're **bad**  
stories

# Narrative matters for scenarios

People know  
how stories work

Narrative  
qualities  
influence how  
believable  
scenarios are

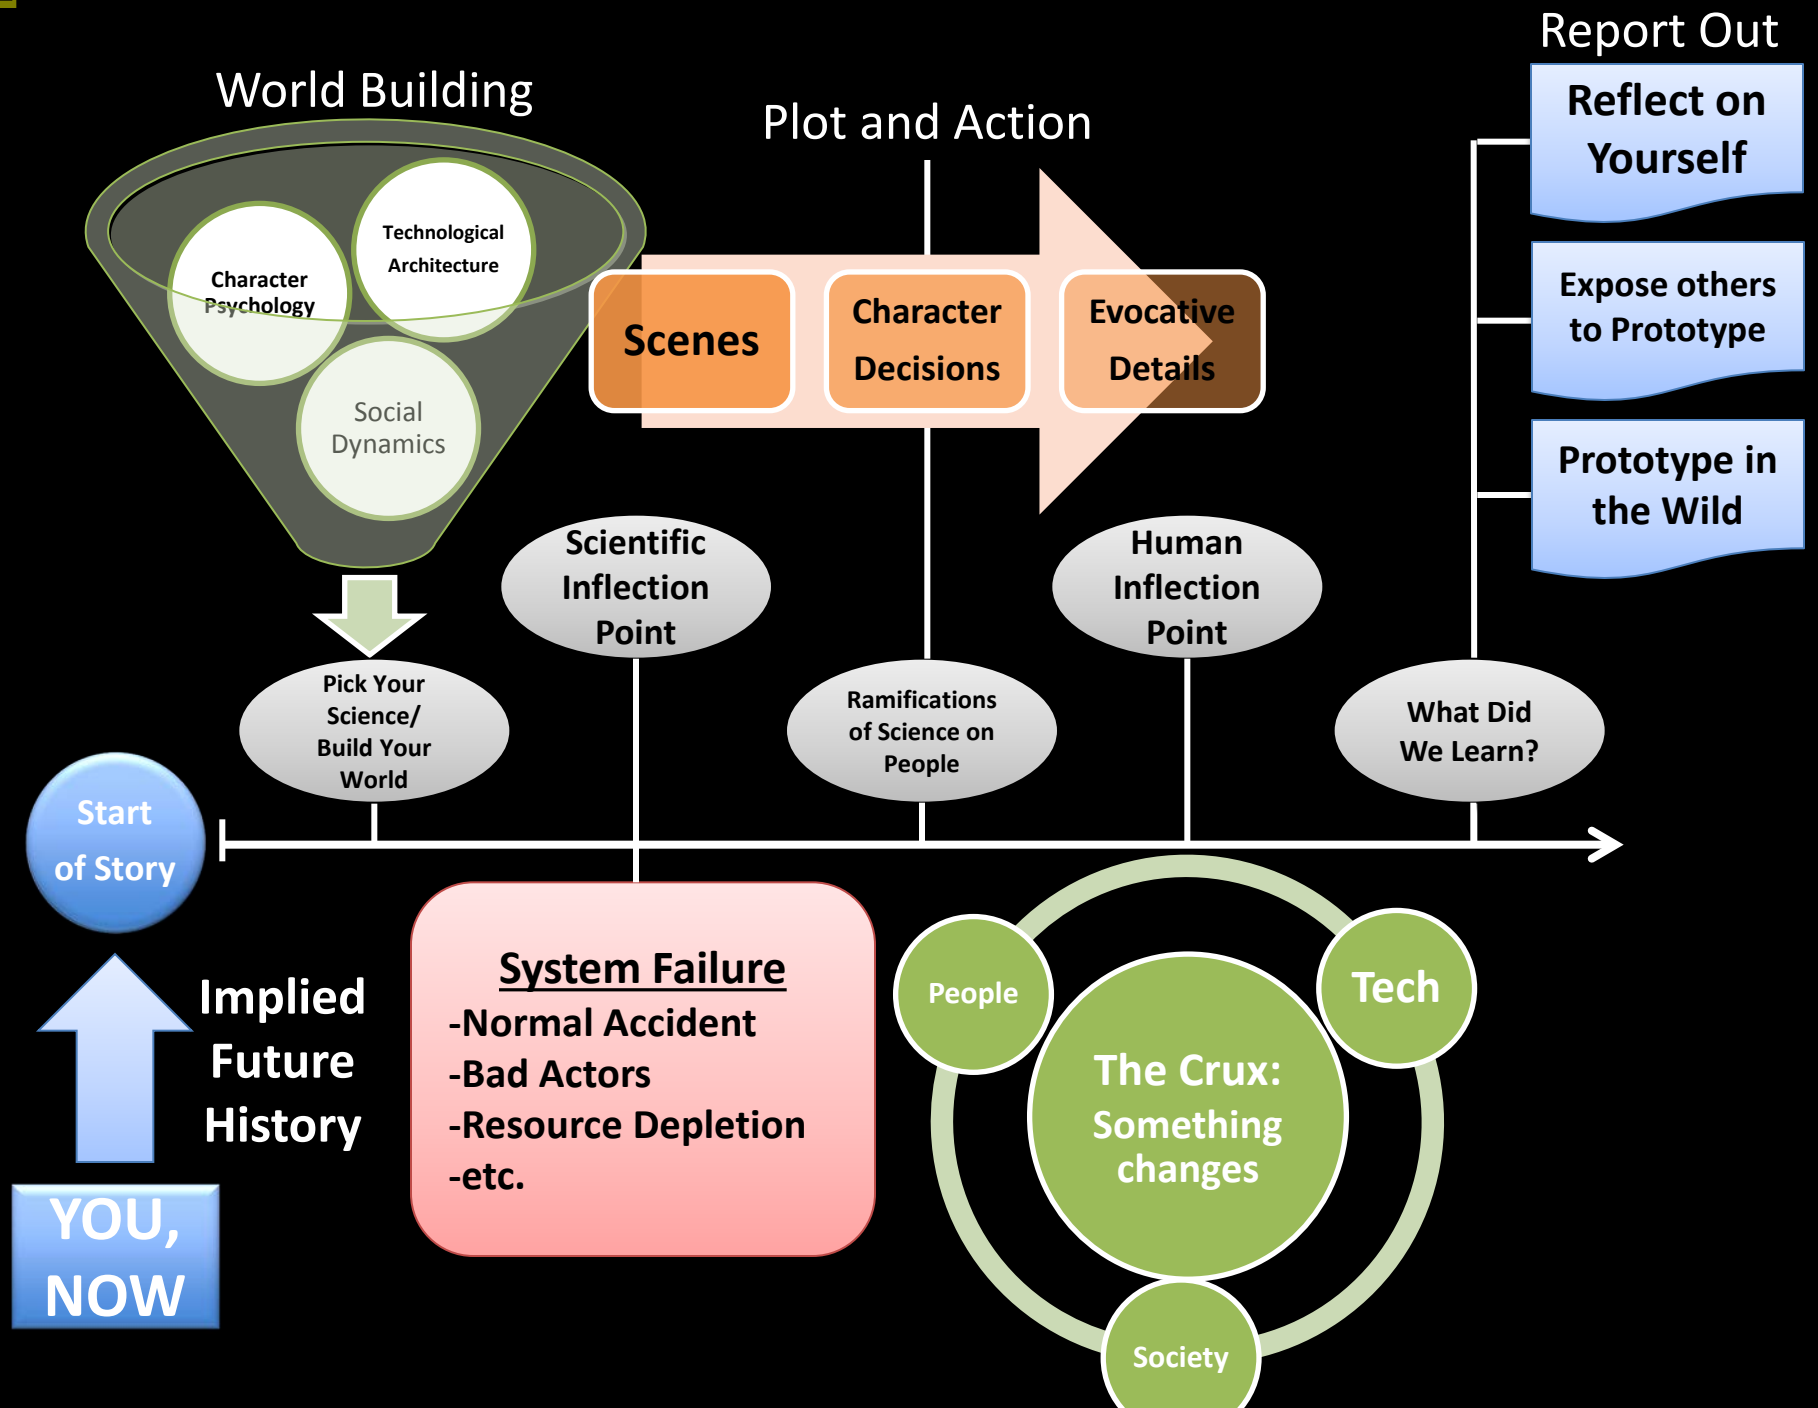

Scenarios are a  
“process method”

# Science Fiction Prototyping

Brian David Johnson, Intel Futurist  
The Tomorrow Project

# Problems with Science Fiction Prototyping

Relies too heavily on  
intrinsic knowledge

Insufficient  
consideration of  
alternatives

Writing is slow and  
solitary

No way to resolve  
disputes

# EVENTUALITY

# Collective Storytelling via Games

# Game Design Principles

Generate Surprise and  
Conflicts

Cooperation &  
Competition

Structured Negotiations

Language game/  
Minimal mechanical  
complexity  
(Poker Hands)

# EVENTUALITY Demo

**EVENTUALITY:**  
A Narrative  
Foresight Engine

# Step 1.1: Generate Starting Facets

## Gizmo

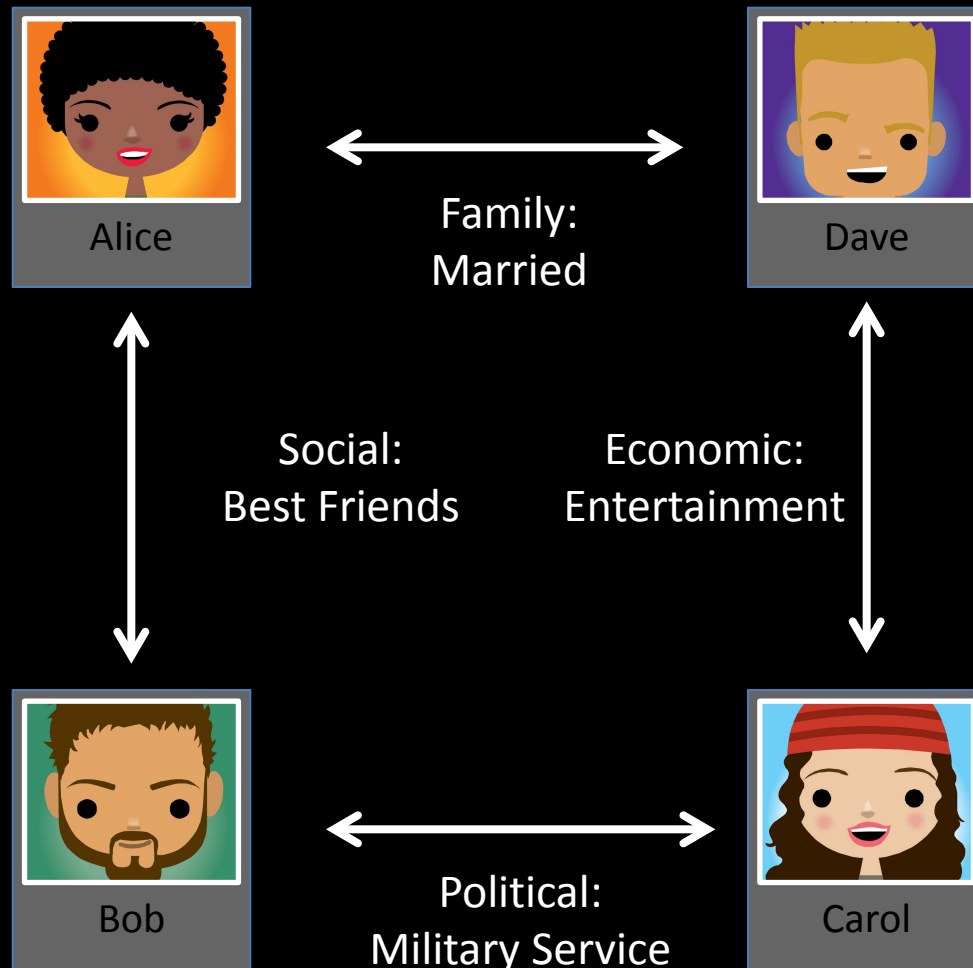

# Step 1.2: Generate Starting Facets

## Social

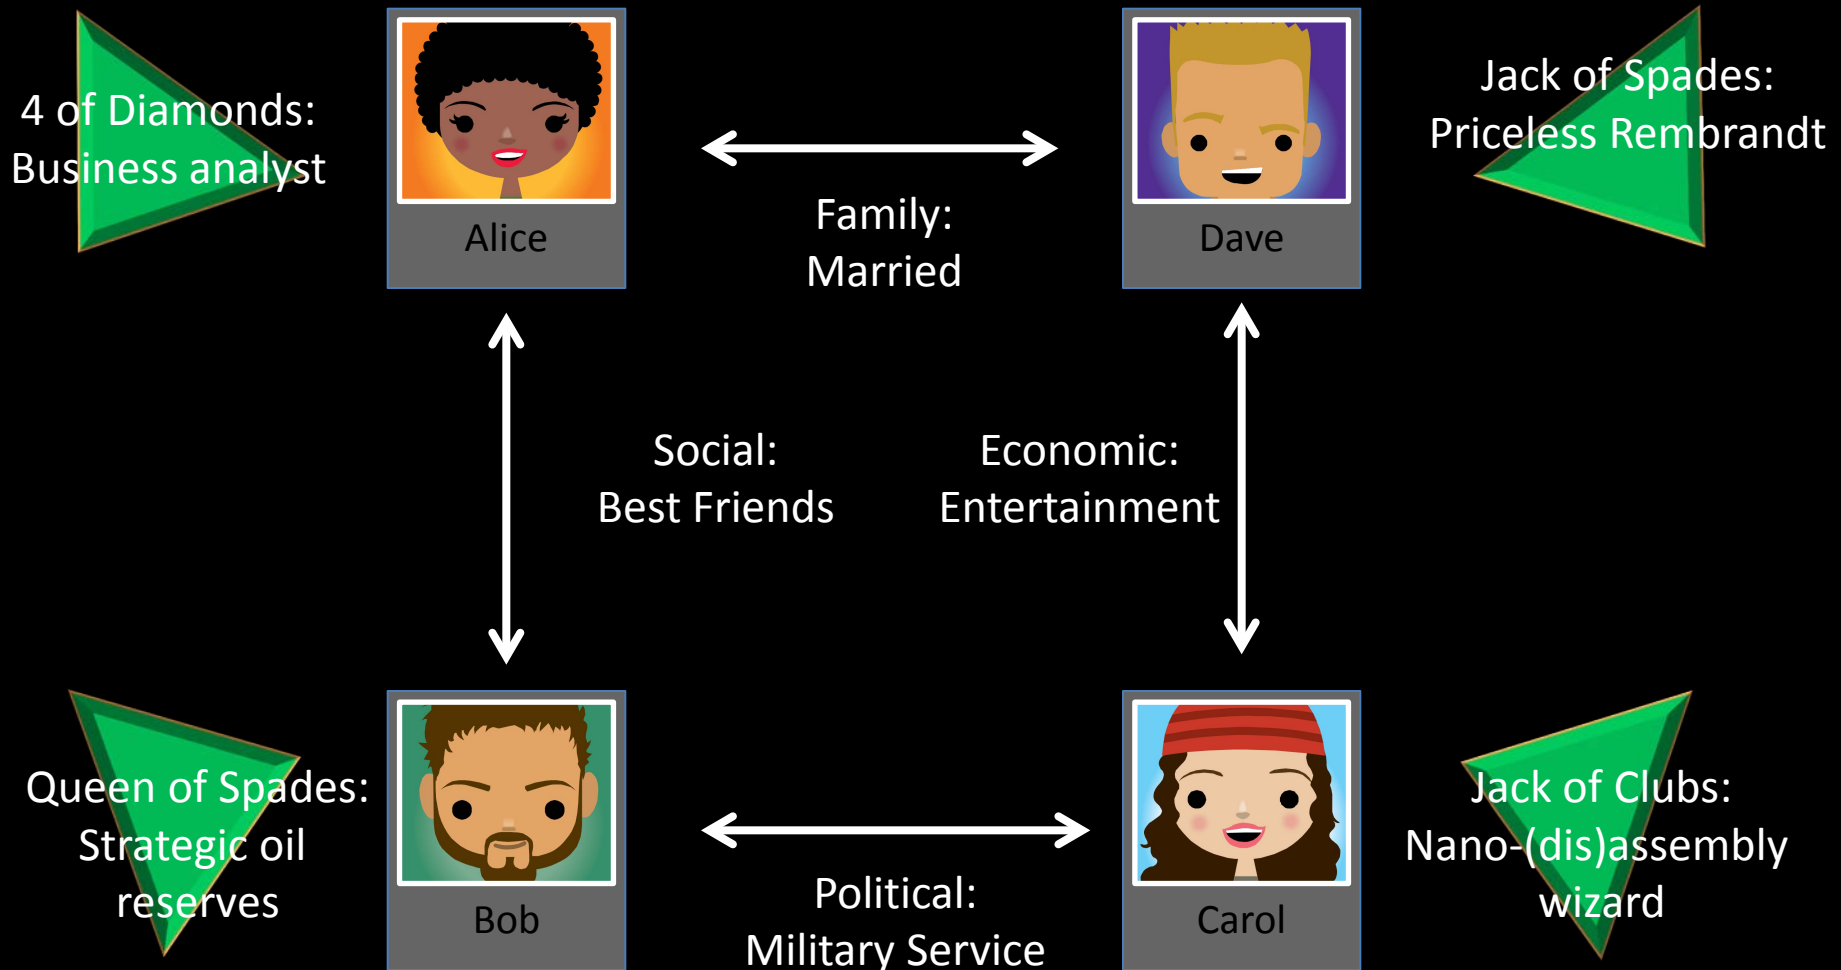

# Step 1.3: Generate Starting Facets

## Relationships

# Step 1.3: Generate Starting Facets

## Relationships

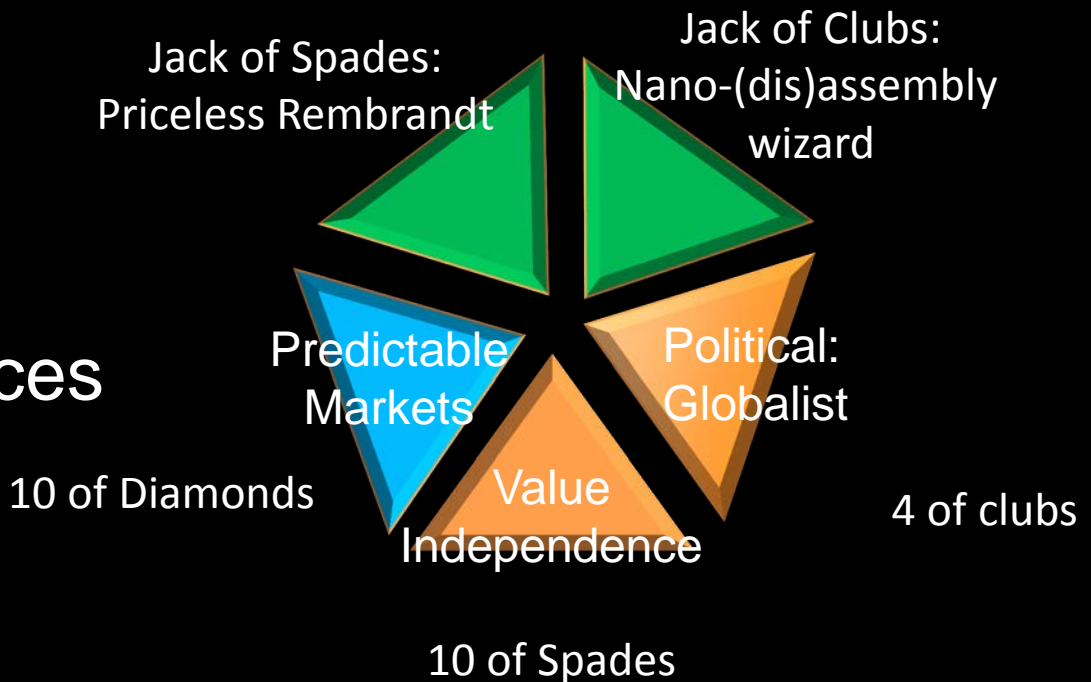

# Step 2: Scenes combine Facets to make Events

Directs:  
invokes two facets  
Assigns three valences

Result: 2 pairs

# Valences

Hearts: Emotion

Love  $\leftrightarrow$  Hate

Diamonds: Rationality

Knowledge, Plans,  
Ignorance, Confusion

Clubs: Entropy

Change & Destruction

Spades: Coherence

Stability & Stasis

# Moves

Assign a Valence to a Facet

Replace a Valence in play

Discard and draw new cards

Direct a Scene

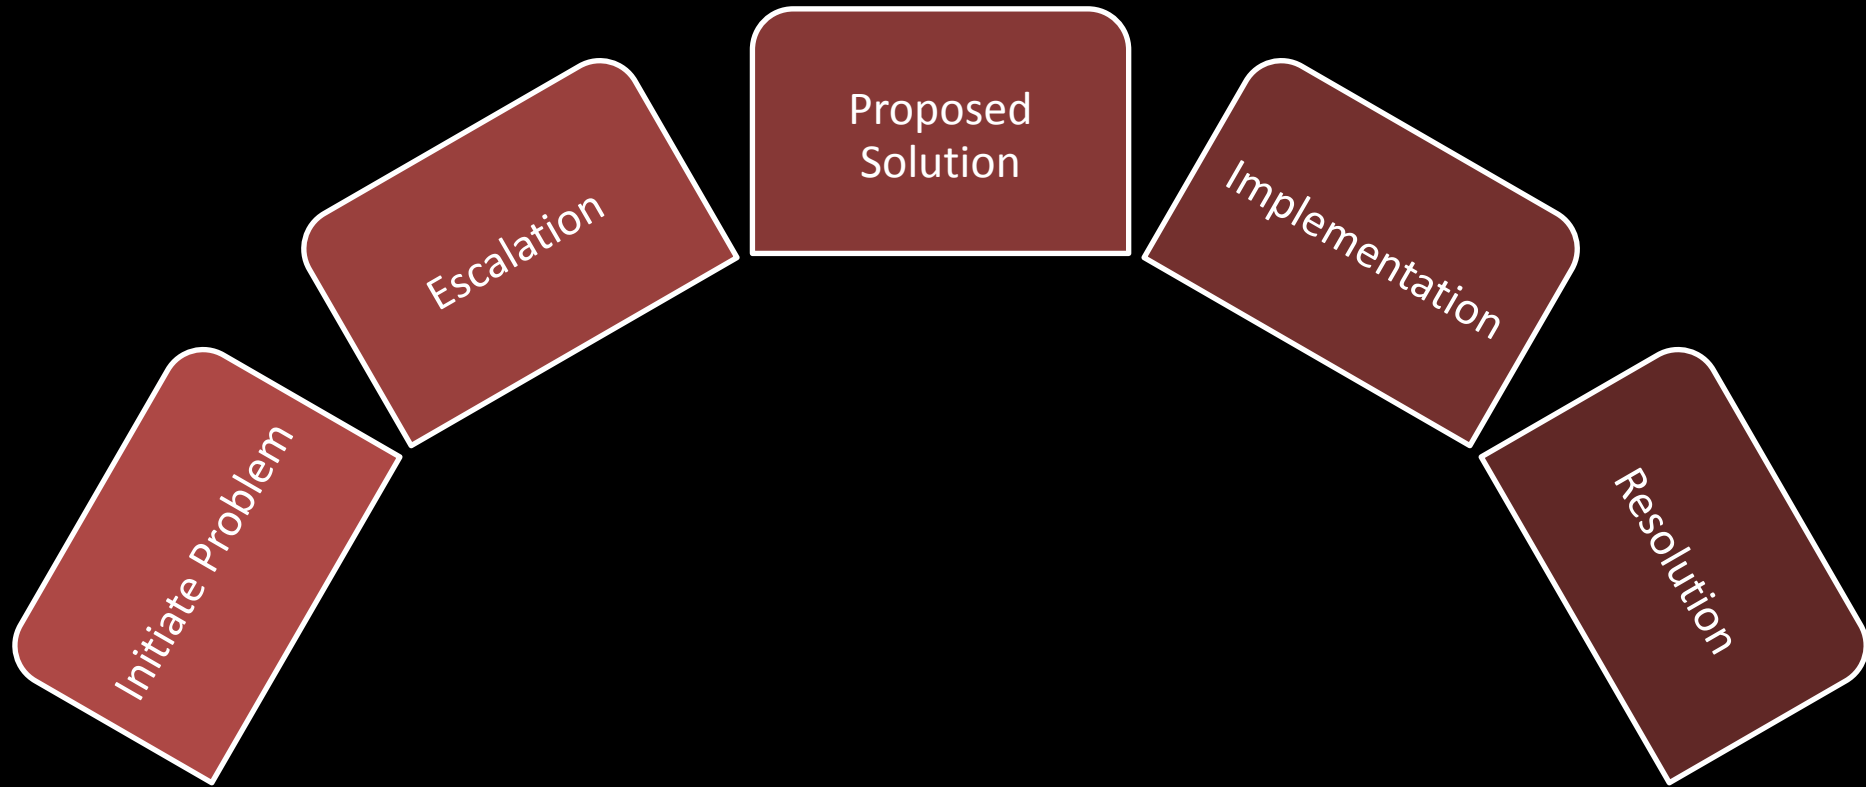

Construct Events

Challenge Events

# Scene Progression

# Initiation

**Carol:** I'm going to  
use my nano skills to  
'dupe' Dave's  
Rembrandt

# Escalation

**Alice:** Disrupting the value of 'authentic originals' sends shockwaves through the global economy

# Proposed Solution

**Dave:** Nano-assembly works better starting from basic hydrocarbons.

# Counter-Solution

**Bob:** What if we tag nano-produced items so originals remain original?

# Implementation

**Bob and Carol:** Settle  
duping dispute.  
Convince world to  
enact nano-tagging.

# Implementation

**Alice and Dave:**

**Destruction of old  
cultural wealth allows  
birth of new rational  
energy-matter economy**

# Resolution:

# Gameplay Goals

Winning Events add permanent cards to your hand

Best hand at end of game determine final outcomes

‘Chaos’ deck of discarded cards can win—everybody loses

# EVENTUALITY

## Strengths

- Play time about 3 hours
- Facets can be easily customized to examine different types of futures
- Reflects what players know, not designer biases
- Generates interesting narratives

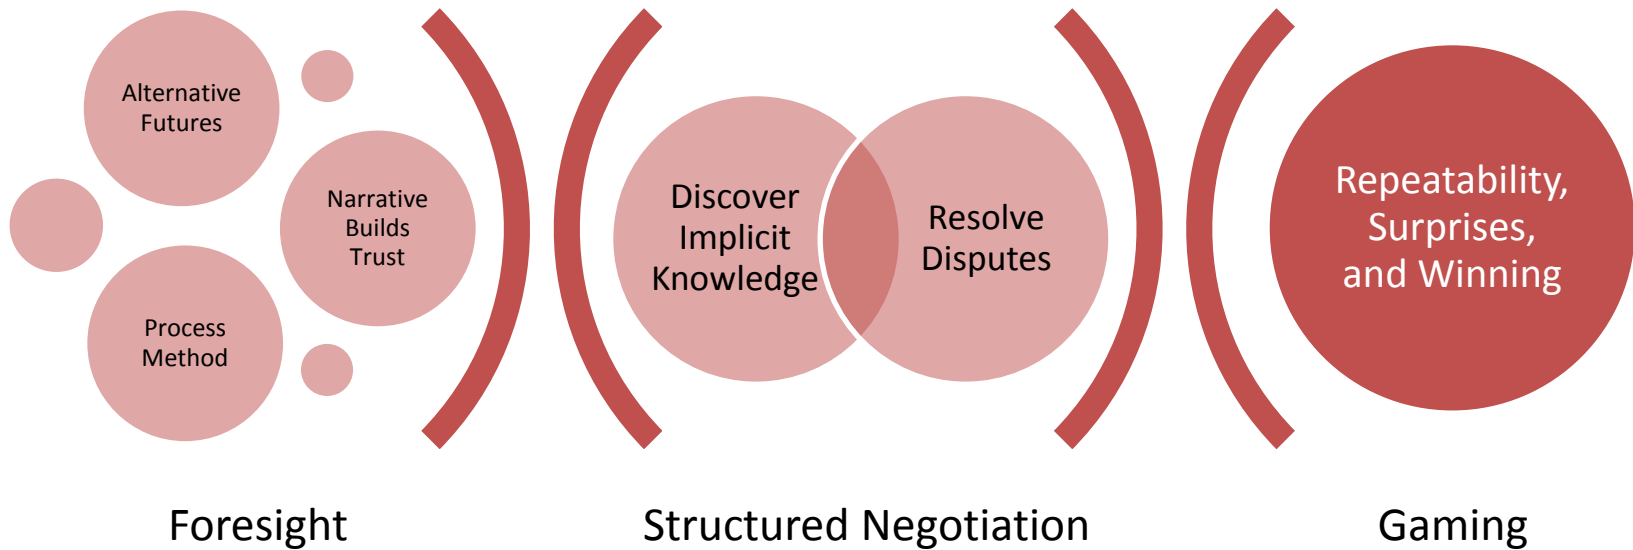

# EVENTUALITY

## Weaknesses

- Too involved for many public engagement projects
- Does not actually have an 'educational' component
- Framing of (problem → solution) may be too prescriptive
- “Soap opera” drama can overtake foresight
- Does the gameplay achieve objectives?

**The only way to build  
Imaginative Capacities is  
to Practice Imagination**

# Conclusions

# Thank You!
