

Timothy Takahashi, JD, PhD is presently Professor of Practice in Aerospace Engineering at Arizona State University. Prior to completing his law degree at Santa Clara University and joining ASU, he worked for 16 years in aviation technology development for businesses such as Lockheed-Martin, Northrop-Grumman and Raytheon. He is interested in aircraft flight sciences disciplines such as aerodynamics, propulsion and performance. He is also interested in Administrative Law issues pertaining broadly to the aviation business and to aircraft design challenges. He is the author of 60+ engineering papers as well as 4 formal law review articles.
